The following sample(s) was/were submitted and identified on behalf of the client as:

Sample Description : (A)Sample (White)

Style No. : S-TFK111212M 280gsm Mesh

Sample Color : (A)White

Proposed Care Instruction :

Sample Receiving Date : Mar 16,2020

Testing Period : Mar 16,2020 - Apr 10,2020

Test Result(s) : For further details, please refer to the following page(s).

Test Performed : Selected test(s) as requested by applicant

Signed for and on behalf of

SGS-CSTC Standards Technical Services (Shanghai) Co., Ltd Testing Center

Hattie Chen (Account Executive)

Test result Flammability#

<u>Test Requested</u>:
To determine the flammability (building materials class B1) in accordance with DIN 4102-1 (May 1998) Fire behaviour of building materials and elements Part 1: Classification of building materials, Requirements and testing

Classification: The tested sample meets class B1 building materials requirements of DIN 4102-1 (May 1998).

I. Test conducted

This test was conducted as per DIN 4102-15:1990 DIN 4102-16:1998 and DIN 4102-1:1998 Clause 6.2, and Classification in according to DIN 4102-1 (May 1998) Clause 6.1-Class B1 materials.

II. Sample details

General description	Fabric	
Color	White	
Area Density	284 g/m²	
Size of sample	190mm×1000mm & 190mm×90mm	

Conditioning

Prior to testing, the sample was conditioned at least 14 days to constant mass at a temperature of 23 ± 2 °C, and a relative humidity of 50 ± 6 %.

niess otherwise agreed in writing, this document is issued by the Company subject to its General Conditions of Service printed vertical, available on request or accessible at http://www.sgs.com/en/Terms-and-Conditions.aspy and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-e-Document.aspx, tention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is dvised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of itentions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a ansaction from exercising all their rights and obligations under the transaction documents. This document cannot be reproduced accept in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or ppearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the soults shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 30 days only.

Date:April 10,2020

Page 6 of 6

IV. DIN 4102-1:1998 Criteria for classification

- 1) All materials, except flooring, may be classed as B1 materials if they meet the following requirements a) and b):
- The test using the 'Brandschacht' apparatus described in DIN 4102-15 (cf. subclause 6.1.3.1) shall be deemed passed if
- The mean value for the residual length (portion of specimen that has not burned or charred; cf. subclause
- 9.1 of DIN 4102-16) of each specimen is at least 15 cm and no individual values are lower than 0 cm,
- The mean effluent temperature does not exceed 200 °C in any test,
- The requirement for the residual length of each specimen is met even where there is afterflame, afterglow, or smouldering.
- b) Pass DIN 4102-1: 1998 sub-clause 6.2.3 Ignitability Test if
 For each specimen, flaming doesn't reach the gage mark within 20s after flame application.
- Materials may be classed as B2 materials if they pass the ignitibility test specified in DIN 4102-1: 1998 subclause 6.2.5.

For each specimen, flaming doesn't reach the gage mark (150mm marks) within 20s after flame application.

3) Combustible materials which cannot be classed as B1 or B2 materials shall be classed as B3 materials.

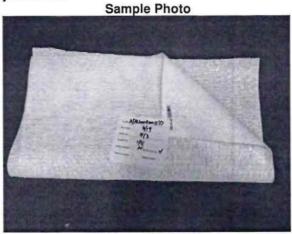

STATEMENTS:

This declaration of conformity is only based on the result of this laboratory activity, the impact of the uncertainty of the results was not included.

This test report does not replace any mandatory certification of the product that may be required.

The test results relate to the behaviour of the test specimens of a product under the particular conditions of the test; they are not intended to be the sole criterion for assessing the potential fire and smoke hazard of the product in use.

#: This test was carried out by ANJI lab.
